

We are a growing start-up company in the semiconductor field based in Val Venosta, Italy, that offers an engineer or technical draftsman position.

Responsibilities

- Development and design of prototypes using 3D CAD and simulation software (PTC).
- Dimensioning and laying out of machine elements.
- Generation of production data in 3D / 2D.
- Building and testing of prototypes.
- Supervision of individual projects.
- Possibly support during commissioning at customers.

Requirements

- Good knowledge of mechanical engineering elements
- 3D imagination
- Good knowledge in technical drawing
- CAD experience is an advantage (3D / 2D)
- Skilled craftsmanship
- Good knowledge of German or Italian
- Good knowledge of English required
- Willingness to travel (as needed)

The company works with the latest cutting edge technologies and offers further training in various sectors of mechanical engineering.

We look forward to receiving an application by email: jobs@scientific-solutions.eu
